PREREQUISITES

Undergraduate molecular and cellular biology or biochemistry

OVERVIEW OF COURSE

The course has four modules. The first two modules focus on building student understanding of basic principles and foundational knowledge of molecular mechanisms controlling plant growth, development and adaptation. The second two modules introduce students to current genomics technologies, data and analyses with the goal of stimulating students to think critically and creatively about current research questions.

COURSE LEARNING OBJECTIVES/OUTCOMES

Upon completion of this course, students will:

1. Understand the current status of knowledge in plant genome structure and the molecular mechanisms of
 - a. DNA replication & repair
 - b. Cell cycle
 - c. Transcription, splicing & translation
 - d. Regulation of gene expression
 - e. Metabolic control
2. Dissect genomes, transcriptomes, proteomes and metabolome data using
 - a. Web based tools for analysis
 - b. Case studies from the primary literature
3. Proficiently access and interpret web based data sets and apply web based tools to their interpretation
 - a. Apply tools in a research context to solve current problems
4. Integrate web based information and primary literature to generate hypotheses

Methods in Enzymology Guide to Molecular Cloning Techniques (Berger, Kimmel, ed. 1987)

Papers from the primary literature will be assigned

GRADING

The four sections of this course will be graded independently. The final grade will be determined by performance on homework and the exams. In general, each section will be worth 100 points, but this value will be normalized based on the number of class periods in each section. The final grade is assigned based on the cumulative percentage attained over all 4 sections. Class attendance and participation will be considered in assigning grades that are close to a cut-off.

Information on current UF general grades and grading policies can be found at <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx> and the Graduate Catalog at <http://gradcatalog.ufl.edu/content.php?catoid=2&navoid=762#grades>

Note: EXAMS will be scheduled in the evenings outside of normal class hours or they will be take home exams.

PROFESSIONALISM STATEMENT

Scientists are professionals guided by specific values and behaviors. These values and behaviors include respect, cooperation, active participation, intellectual inquiry, integrity, timeliness, and attendance. In addition to your performance on the graded materials, you will be evaluated on your growth as a professional. Professional characteristics include punctuality, attendance, participation, collegial attitude, and willingness to help others learn. Your attendance at all classes is a firm expectation, but if you are ill or an emergency occurs, contact your instructor PRIOR TO the scheduled class time.

CLASS POLICIES

LATE ASSIGNMENTS- A penalty of 33% per day will be taken off for each late assignment. Reasonable explanations for late assignments will be taken under consideration, particularly if communicated ahead of the deadline.

MAKEUP EXAMS- Make-up exams or course work will be accepted only by special permission of the course instructors. Permission to make up work will be granted on a case by case basis and not all requests will be approved.

Grades and Grade Points

For information on current UF policies for assigning grade points, see <https://catalog.ufl.edu/ugrad/current/regulations/info/grades.aspx>

Absences and Make-Up Work

Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at:

<https://catalog.ufl.edu/ugrad/current/regulations/info/attendance.aspx>.

Academic Honesty

As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: "*We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.*" You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "*On my honor, I have neither given nor received unauthorized aid in doing this assignment.*"

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of

disciplinary action. For more information regarding the Student Honor Code, please see: <http://www.dso.ufl.edu/SCCR/honorcodes/honorcode.php>.

Software Use:

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

Campus Helping Resources

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university's counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.

Services for Students with Disabilities

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the Instructor when requesting accommodation
